### Cure For Chest Wall Deformity

Pectus Carinatum is a malformation in which the chondrocostal overgrowth displaces the sternum forward.

### Read Some Success Stories

Our patients have registered positive, noticeable results in as little as 3 to 6 months!

### No Need For Surgery

This Balloon Brace® is specifically designed to ease the treatment of malformations of the chest wall deformity (Pectus Carinatum)

### What Makes this Brace Unique?

Because the available options are too hard and uncomfortable, this Balloon Brace® is here to change all this.
